

Scenario 1

Student is studying in 10th he wants to be a journalist, but BYJU'S is providing only math's and science. So he asks that why should I go for this two subjects I am arranging an offline tuition with six subjects moreover the child is weak in social and also we don't want to go in science field.

Answer:

As the Child is in 10th class and he has major subject as science and math's that are not two subjects. And journalism is something that you pursue after 12th for graduation. So, focusing on the Board exams science and math's are more important. And tuitions are not giving that practical knowledge.

Scenario 2

My child is great at studies she is in 8th class and scores 95%. She is self learner and very much interested in studies. And she has all the concepts cleared. Why BYJU'S?

Answer:

That's great mam, has she appeared for the competitive level exams too? There might been something wrong as the result she might had got would be unexpected because of the practical knowledge. The Olympiads are National level exams there concepts and Application matters the most. And BYJU'S Focus on the same thing.

Scenario 3

My child is in 5th class and he is doing great in studies. And my husband is an IIT Graduate, he has all that knowledge of science and math's. Why BYJU'S?

Answer:

That's great he is in 5th class and good at studies and as father is also an IIT graduate. So he might have been seeing the parent also studying.

He might be knowing the importance of practical learning and school method learning, and he will not be able to make him study or explain every concept to him as he is busy always. So, BYJU'S will always be with child and give that practical knowledge.

Scenario 4

Father is all against online learning, he is strong believer of traditional method of learning that is black board method. So, convince him to buy BYJU'S

Answer:

You might have heard about the Gurukuls where Rishi's give that education in Sanskrit to child in Ancient time. But now the traditional period is followed. And BYJU'S is making education more easy for the children's to understand by animations and real life examples. So, no teacher can teach you through animation and visualize you the 3D figures.

Scenario 5

I'm highly interested in BYJU'S but due to pandemic I don't have money to buy the course. And I already have loan done on my House and Car. So, will not be able to buy this course right now.

Answer:

Okay I can understand that, but as you have seen how we teach and how much beneficial is for the child as he is studying by school method from so long and has no practical knowledge about the concepts. And talking about loan, house and car will never give you return in future. But if your child takes a good education there is high return in future.
