

Scenario 1

My elder son went to Resonance and did above average in the school and competitive exams. I am planning to enroll my younger kid with Resonance. Why BYJU'S?

Answer:

This idea is good but about 300 student studies in a class in Resonance or any other in Institute. If he will get a doubt will he be comfortable of asking in class, and one teacher is teaching 300 students at what pace he will teach the child.

So, these problems is solved by BYJU'S, he will get to study from India's Best teachers and able to ask question from the mentor personally.

Scenario 2

His school is already teaching him through videos during these times and there are online assessments done by the school too, why do I need an additional program with an added expense?"

Answer:

Videos doesn't mean that recorded sessions, BYJU'S has animated videos by which we can visualize the 3-D images also and understand about everything in Practical by using real life examples.

It is an investment as the competition he will be facing in the test on BYJU'S is equivalent to any real competition.

Scenario 3

My child is not even getting good marks in school exams. I don't want to burden him with competitive exam preparation as of now. Will think about it next year (Student is in class 11th)

Answer:

The Preparation of competitive exam starts from 11th itself as the syllabus that the competitive exams covers is of 11th and 12th.

So, if he want to go for competitive, he needs to start it from here itself. And competitions are all about concepts and application so he will be also automatically good at his academics also.

Scenario 4

He/she scored 90% in the class 10th examination. Even in the school exam he performs good. But he has been struggling constantly in the JEE mock tests which he wrote. Looking for an alternative.

Answer:

This is very common problem children are facing because of conceptual clarity is not there they unknowingly memorize the topics and when comes to competitive exams, there only application-based questions are asked. So, there they lack behind. BYJU'S works on the same thing that is conceptual clarity.

Scenario 5

He needs someone to push him regularly for studies. I cannot trust that he will study from a tablet Device. We are planning to arrange for a personal Tutor for him.

Answer:

You are seeing the course in form of tablet, about 2 crore children are studying from this tablet only. And the concepts are taught through the animative and visualized way so that the child makes an interest in subject and studies properly.

So, he will not need any push as he will make a habit of self-learning. Any personal tutor cannot make you visualize the concepts to have a better understanding.
